RateAcuity Datasheet

Insight through powerful data.
Accurate, nationwide electric rates at your fingertips.

ACCURATE   TIMELY   CONVENIENT

KEY FEATURES

- Web Platform with advanced filtering and query options

- API for seamless integration with applications and reports

- Historical data tracking

- Accurate, reliable electric rates from various utilities nationwide

KEY BENEFITS

- Frees staff time to focus on other high priority functions

- Standardized format allows easy integration to applications

Product Highlights

KFR Services RateAcuity™ electricity rate database gives our clients the rates listed in tariffs and schedules from electric utilities across the country. Our staff of expert rate analysts and our 40 years of experience in dynamic data environments enables us to monitor tariffs and deliver the most accurate and up-to-date rate databases to the energy and telecommunications industries.

Web Portal

Our user-friendly interface enables self-service searches and report generation, providing instant access to the specific data you need, and replacing countless hours spent searching for and analyzing rate schedules and tariffs.

API Access

Our API option gives you access to our complete database, pulled into your platform on demand, so you always have the most current and accurate rates. In addition to eliminating the need for your staff to search for and analyze rates, this option avoids the need for data entry of those rate tables to drive your software.

Historical Data

RateAcuity's historical reporting allows you to help your clients understand the past, analyze market trends as they're evolving, and forecast for the future with predictive analytics.

Technical Specifications

Server	API Calls	Notes	
Hosted by Microsoft Azure Cloud	XML and JSON	Stress tested for high-volume of data
